

THE GUMBOOT BOUTIQUE

BOOT SIZING CHART

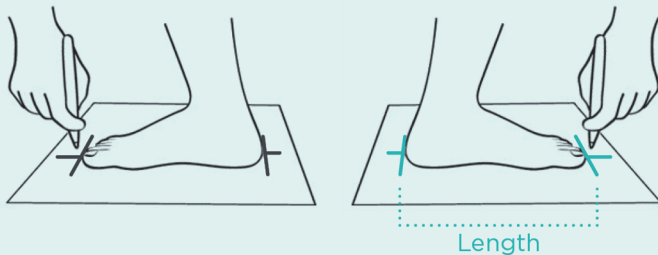

The Gumboot Boutique guide to **choosing the correct size**

Footwear from different manufacturers can differ in size. Take some time to work out exactly the right size for you.

1

Measure your foot length:

Place one foot on a piece of paper and trace its outline. Then do the other foot, as they are likely to be slightly different lengths.

2

Measure the distance from the bottom of the heel to the top of the longest toe.

TIPS

- Trace your feet in the evening, after they have swollen to their maximum size.
- Wear the socks you are likely to wear with your gumboots.
- Sit on a chair, so your foot is perfectly flat.
- Trace around the foot as closely as possible without angling the pencil in or out.

3

Choose the measurement of your longest foot and use the chart below to choose your boot size. (If you are between sizes, go to the next size up.)

SIZE CHART

Add 5mm to your foot measurement to make sure the boot will fit comfortably.

Your foot length, up to	Choose size	Inside boot length is
220mm	36	225mm
225mm	37	230mm
235mm	38	240mm
240mm	39	245mm
245mm	40	250mm
250mm	41	255mm
260mm	42	265mm

Chart applies to this style:
